Re: Fresh air by EcoQuest

We here at Busy Bodies have had the Fresh Air by EcoQuest system in place at our day care since the year 2006.

While running a day care it is important to not only make sure the facility is clean but that we are doing everything possible to keep our children and especially our staff healthy. The EcoQuest system is beneficial in providing that for us. We've had a tremendous drop in absenteeism with not only our employees but children since it has been in place. If there is ever a child who has been running a fever or sick with diarrhea or other we move the system to that classroom and just crank it up to clean out the air and "hopefully" avoid any one else from catching whatever they have.

We also have children who are asthmatic and one specifically that is highly allergic to any aerosol products. When we repainted the day care we place one of the units in the rooms as we were painting and not one person could smell the fresh paint.

The EcoQuest system has worked wonders for our facility and I would highly recommend any daycare or home that has children with asthma to invest in the system.

Sincerely
