

March 18, 2010

To whom it may concern,

My name is Jennifer Franklin and I have been a teacher at Covenant Classical School for four years. I personally suffer from allergic rhinitis, and other allergies and sicknesses throughout the year. Our school recently purchased an FreshAir Surround, and I was fairly skeptical of its ability to truly sterilize the air, and objects in the room. It was quickly proven to me that these machines do as they are promised to do. For about a week I came and went from work not really thinking about the new air purifier in my classroom, until I noticed that many of the children who had perpetual runny noses had cleared up. I then realized that my own stuffiness had disappeared. I went home so happy that my sinus pressure and runny nose had gone away. I could finally breathe! I went to bed that night and by the next morning my allergies had returned. I came in to work feeling miserable, but after an hour or so had passed my symptoms were magically gone again. I know that the FreshAir Surround is the reason I can breathe effortlessly at work. I am now considering buying one for my home. I believe that they are a great investment for any company, if for no other reason than keeping their staff members well. Not to mention in our specific situation, we have much happier parents in our room due to the fact that their children are not constantly sick anymore. These purifiers are worth every penny spent!

Sincerely,

Jennifer Franklin
