Dear Consumer,

The Ecobox, an air purifier by EcoQuest, has been a wonderful addition to our agency. Many of our clients have compromised immune systems and it is imperative that the environment is free of any illness causing particles and bacteria. An average day consists of a capacity of sixty or more people and at times adequate air circulation is not sufficient causing stuffiness and odor. Coughing, odor, and nasal congestion have been primary complaints of our clients. However, since the introduction of the Ecobox systems the area is free of odor, stuffiness, and coughing/nasal congestion complaints have ceased! We noticed a huge difference in the air quality immediately! My only regret is that we didn't consider this product sooner!

Sincerely,

Windy Nicholson
