Dear Ecoquest International,

When I first heard of you Living Air products, it was on the radio. I always wondered would it work and would it be affordable for me. About a year and a half ago, I was diagnosed with asthma due to my allergies. I was then put on an expensive prescription allergy medication that cost me about \$75.00 per month not including the inhaler I needed to use. At that time, I started to think that I didn't know if I could afford to take this medication for the rest of my life, so that is when I started looking into air purifiers. I wanted something that I didn't need to buy costly filters for and something that would do my entire home. By the time I contacted a dealer, I was at my breaking point. I was having to use my inhaler two or three times a day and I was using my medication intermittently trying to save money. This was not the way I wanted to live. So, I contacted Mr. Ed Howse who sent me the Flair system for my home. Within 2 days, I was no longer having to use my inhaler and I could sleep when I went to bed at night because I could finally breathe without struggling for air. I am proud to say that I am totally off my medication and feeling so much better! Even better, I did the math since, I have had my unit since December 2003. By May 2004, it will have totally paid for itself. Thank You Ecoquest for giving me my life back.

Sincerely,

Lorri Blattler
