EcoQuest
Mr. Jacque BoNey
P. O. Box 1815
Southaven, MS 38671

Dear Mr. BoNey,

Thank you for introducing our company to the EcoQuest Air-Purification System! The Fresh Air Unit has been nothing less than a blessing to our staff.

Upon testing the unit in our embalming center, we found that the entire area was totally rid of poignant formaldehyde odors. This was absolutely amazing considering the high volume of formaldehyde and other chemicals we use! Unlike the OSHA- required stationary ventilation system that we have, the EcoQuest Purification System cleanses and replaces fresh air throughout the area. The difference in the quality of air that our staff was able to breathe was remarkable!

We were so impressed with this product that we purchased two units! One purifier is being used in the embalming center and the other is being used for the general public areas of the funeral home.

We simply can't imagine being without our purifiers now that we have them. Beyond this, we owe it to our clients and staff to provide them with fresh quality air to breathe.

Sincerely,

Wendell J. Naylor, CFSP, MBIE
