

Almeria, (Spain) January 15th, 2008

We have been using Activ-Tek air purifiers distributed by G&N AIREPURO for over half a year . It is very gratifying to have experienced a progressive change in the air quality of our restaurant, with the elimination of odors and food smell from clothing.

At the moment, we are receiving many complements from our clientele on the freshness of the air, and the absence of food odor inside our establishment.

Thus, we recommend the use of these purifiers as an effective system to deodorize the air indoors. Our personal experience has been excellent.

Manuel Sánchez Martínez
General Manager P.H. Almería
