Our Shelby Baptist Association Ministries Center serves needy families in our County. Used clothing, household items and furniture are given to assist people. There is an incredible amount of dust, mold, mildew and dirt associated with used goods. We have thousands upon thousands of items that are received and processed. For years I could not walk through and breathe when I needed to go to that location. I limited my trips into the work area since I take allergy medication every day. Through a volunteer, Ed Simmons, who realized there was a product that could help with the air quality in our building, we purchased an air purifier manufactured by EcoQuest International. After installing this air purifier, I realized I could go into that area and hold conversations, and even spend time with our volunteers in the work room. That is important to me because volunteers operate the Center. We also placed one of the purifiers in our waiting room and one in our thrift store.

A separate facility is used for our Christmas ministry, so we purchased two air purifiers for that location. Our ministries buildings are public facilities, and the health of our volunteers as well as those we serve are important issues.

We have been more than satisfied with the results of these air purifiers for the Ministry. In addition, I purchased a unit for my home. I am delighted with the results at home and work!
